2. BRANDIS AIRFIELD

25X1

10 Nov 56

Several mock-up aircraft were observed positioned around the airfield. On subsequent days these mock-ups had been moved about.

12 Nov 56

A twin jet aircraft made several circuits over the airfield without landing at about 1030 hours, and again on 19 Nov at about 1400 hours.

13 Nov 56

(runway matting)
It was learned that removal of PSP by road in several 3-axled lorries had commenced on 9 Nov 56 and several shipments had been made daily between the 9 and 14 Nov 56. It could not be ascertained where the lorries had come from but they left the airfield in the direction of WURZEN.

17 Nov 56

Considerable activity was observed on the airfield. This included road traffic in and out of the airfield and the arrival of SAF personnel in small groups up to ten men by rail and road.

24 Nov 56

As reported in Serial 20 above, a General's train comprising two coaches and luggage van arrived on the airfield at approx 0930 hours and an inspection of the airfield and buildings was made by a group of high ranking officers.

25X1

Shipments of fuel to the airfield are reported in Serials 13 and 19 above.

Finally on 1 Dec 56 troops and other equipment arrived as reported in Serial 27.

Up to the evening of 4 Dec 56 no aircraft had arrived on the airfield.

3. POSSIBLE RADIO STATION LOCATED SW OF BRANDIS AIRFIELD.

In a large country mansion known locally as the Villa von Schaub at MR 323 874, some sort of radio installation has been in use for the past 3 or 4 months. The villa is strongly guarded by Volkspolizei and is allegedly some sort of research station connected with VEB Funkwerk, LEIPZIG. It is known, however, that the occupants are Russians in civilian clothes. Some are resident in the villa, but most of the personnel are brought daily by German cars from LEIPZIG. No observation of aerial arrays is possible as the villa stands in spacious grounds which are thickly planted with poplar trees, and the whole is securely walled or fenced and subject to patrols by the VOPOs.

4. POL DEPOT at GRIMMA.

The POL Depot for the barracks at GRIMMA lies West of the barracks and immediately South of the main road [redacted] where the map

indicates a large barn. This site is fenced and strongly guarded with its own guard hut. Fuel is stored in drums and cans in the barn itself and also underground in large pits which have been dug for the purpose and are covered with pine branches.
